

INDIANA

***AGRICULTURAL STATISTICS
2003-2004***

IN DEDICATION

*Victor Lechtenberg
Dean of Agriculture
Purdue University (1994-2004)*

Dedication to Cooperation

We're dedicating this year's issue of the 2003-2004 Indiana Agricultural Statistics to Victor Lechtenberg, former Purdue Dean of Agriculture and his commitment and service to agriculture in Indiana.

Vic spent more than 30 years working in Purdue's School of Agriculture, resulting in his selection to Vice Provost for Engagement. He served for 10 years as Dean of the School of Agriculture. Serving as the Dean of Agriculture, his leadership guided the school through a number of changes over the last decade.

As Dean of Agriculture, Vic administered the Purdue Cooperative Extension Service system in all 92 Indiana counties. The system includes the 4-H/Youth program that reaches more than 265,000 young people in Indiana. He also administered the Office of Academic Programs, the Office of Agricultural Research Programs and International Programs in Agriculture.

Vic worked directly with Indiana's agricultural leaders, the agri-business community and farmers to find ways for Purdue to strengthen the partnership between Indiana's farmers and the university resources. As Dean, he valued and understood the impact of accurate information and increased the cooperation between the Indiana Agricultural Statistics office and Purdue's researchers and agricultural experts. Vic lead through his example of always being present at meetings and available to farmers, state officials, and farm organizations. His commitment to serve Indiana's farmers was demonstrated daily to everyone who looked at his schedule. A schedule that started when the rooster crowed and often ended late at night long after the cows had come home. The willingness to go the extra mile to serve agriculture was demonstrated by his tireless efforts.

During his long career at Purdue, Vic won the respect of faculty, staff, alumni and public officials. The agricultural community is very fortunate that his next professional challenge allows him to stay on Purdue's campus. Indiana's agriculture community has been fortunate to have Vic's outstanding leadership, and we are all deeply grateful for his contributions.

Thanks, Vic. We wish you continued success.

Acknowledgments

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2003 Indiana State Fair.

Randy Woodson,
Interim Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

**Greg Preston
Director**

In this issue of the 2003-2004 Indiana Agricultural Statistics you will find information and facts about Indiana's agricultural production. Indiana continues to rank near the top in production of corn, soybeans, tobacco, blueberries, peppermint, spearmint, processing tomatoes, fresh market fruits, popcorn, and vegetables for processing, hogs, chickens, eggs, and turkeys raised. This information is developed from surveys conducted throughout the year. The voluntary response and cooperation of Indiana farmers, agri-business firms, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, the NASDA Enumerators, and others throughout the state makes this bulletin possible. Our office pledges confidentiality of all individual reports or business data and strives to collect the most accurate, reliable, and unbiased data possible.

We are pleased to again feature the photography talents of 30 individual 4-H members in Indiana's 2003 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2003 Indiana State Fair, provide a glimpse of the wide variety of Indiana's agriculture. We are grateful to all of the 4-H members who submitted their photos for publication.

This is the 78th edition, which documents Indiana Agriculture in 2003, and is published by the cooperative efforts of USDA's National Agricultural Statistics Service and Purdue University Agricultural Research Programs. The Federal/University cooperative partnership has existed since 1925 and continues to enhance agricultural research programs with State specific statistical projects. Some of those projects include Timber Price Survey, Glyphosate Resistance in Weeds, Corn Ear Rot & Mycotoxin Analysis, Soybean Phytophthora Root Rot & Cyst Nematode Sampling, and Grain Marketing Analysis. Results of these special research efforts are mostly published by the individual research programs and generally not a part of this publication.

Sincerely,

Greg Preston
Director, Indiana Agricultural Statistics

UNITS OF WEIGHTS, MEASURES, AND METRIC CONVERSION FACTORS

Commodity	Unit Published	Approximate Net Weight	
		U.S. Pounds	Metric Kilograms
Corn for Grain	Bushel, shelled	56	25.401
Oats for Grain	Bushel	32	14.515
Rye for Grain	Bushel	56	25.401
Sorghum for Grain	Bushel	56	25.401
Soybeans for beans	Bushel	60	27.216
Wheat, All Types	Bushel	60	27.216
This table contains the units of weights, measures, and conversion factors associated with the commodities shown. There are some variations among commodities in weight per unit of volume resulting from differences in size or variety of commodity.			
Standard Units			
1 Acre = 0.4047 Hectare		1 Hundredweight = 45.359 Kilograms	
1 Square Foot = 0.093 Square Meter		1 ton = 0.907 Metric Ton	
1 Pound = 0.45359 Kilograms		1 Gallon = 3.785 Liters

FARM INCOME

CASH RECEIPTS

Indiana farmers received \$5.2 billion in cash receipts from farm marketings in 2003, 9 percent above 2002. Cash receipts from crops were up 6 percent, and receipts for livestock were up 17 percent from the previous year. Marketings of crops at \$3.4 billion, accounted for 65.1 percent of the total cash receipts in 2003 while livestock receipts, at \$1.8 billion, accounted for the remaining 34.9 percent. In the previous year crop receipts accounted for 67.5 percent and livestock 32.5 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2003 and amounted to \$1.45 billion. Soybeans were second at \$1.39 billion and meat animals were third with \$846 million. Poultry and eggs were the fourth leading contributor to farm income with \$541 million and dairy follows with \$377 million. These five commodity groups accounted for over 89 percent of the 2003 cash receipts.

2003 Indiana Cash Receipts

1/ Includes tobacco, and fruits and nuts.

1/ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

1/ Amounts include only cash payments made directly to farmers.

2/ Direct Payments are authorized by the Farm Security and Rural Investment Act of 2002 for 2002 through 2007 crops. Direct Payments for the 2002 crops are reduced by the amount of fiscal year 2002 payment received under Production Flexibility Contracts. The Act also increases the number of crops authorized to receive Direct Payments.

3/ Program authorized by the Farm Security and Rural Investment Act of 2002.

4/ Includes amount paid under Conservation Reserve, Agriculture Conservation, Emergency Conservation, and Great Plains Program.

5/ Accounts for the supplemental funding provided by the Agricultural Risk Protection Act of 2000, Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act 2001 and Agricultural Economic Assistance Act 2001. Some of these programs include; Crop Disaster Program, Dairy Disaster Assistance Program, Livestock Emergency Assistance program, Quality Losses Program, and Tobacco Disaster Assistance Program.

6/ Miscellaneous Programs include; Forestry Incentive Annual, Dairy Indemnity, Interest Payments, Disaster Program Payments, Payment Limitation Refund, Noninsured Assistance, Disaster Reserve, and Environment Quality Incentives.

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60°F resulted in 84 GDD. The basic formula is: $1/2 (\max T - 50) + 1/2 (\min T - 50) = \text{GDD for one day}$. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

CROP HIGHLIGHTS

ACREAGE: Indiana's six major field crops totaled 12.2 million acres during 2003, up slightly from the 2002 planted acreage. Corn acreage for harvest was 3 percent above a year ago, while soybean acreage for harvest fell 7 percent. Winter wheat harvested acreage was up 30 percent from a year ago and all hay harvested acreage increased 8 percent above the 2002 level. Oat acreage for harvest increased 7 percent from the 2002 level. Other crops showing harvested acreage changes were processing tomatoes up 2 percent, potatoes up 32 percent, popcorn up 8 percent, and peppermint up 22 percent. Spearmint, at 1,800 acres, fell 10 percent from last year.

YIELDS: Field activities were gaining momentum by mid-April as farmers didn't hesitate to take advantage of days suitable for fieldwork. By May 4th, one-half of the intended corn acreage was planted and 17 percent of the soybean acreage was planted. Many early planted corn and soybean fields had already emerged. Frequent showers along with heavy amounts in many areas of the state in early May slowed fieldwork, especially in the southern regions. It was one of the wettest seasons on record. As of June 8th, only 92 percent of the corn acreage was planted and 78 percent of the soybean acreage was planted. Heavy flooding occurred several times, causing lost acreage and many drowned out areas, especially along river bottoms. It was the second wettest month of July during the last 108 years. Growing conditions were ideal during pollination, but dry weather in August reduced grain weight in many of the later planted fields. Soybean yields were significantly reduced by the dry August weather and Aphids. The best corn yields this year were in the west central, central and north central regions of the state. Harvest was underway during early September in some early maturing fields in the southwest. Crops dried down and advanced rapidly toward maturity. Corn and soybean harvest was in full swing by early October. Farmers were thankful for the near perfect weather and field conditions during most of the fall harvest

season. By mid-November, most of the corn and soybean fields were harvested. Yields in corn and soybean fields were highly variable within and between fields. The average yield for corn in 2003 was 146 bushels per acre, 25 bushels more per acre than the 2002 average. Portions of the west central and east central regions of the state had better than expected yields. The average yield for soybeans was 38 bushels per acre, down 3.5 bushels from the previous year. Winter wheat had an average record yield of 69 bushels per acre, up 16 bushels from last year and matched the original record high set in 2000. Oat yield averaged 70 bushels per acre, 8 bushels higher than the 62 bushels per acre set in 2002 and 10 bushels per acre below the record high yield of 80 bushels per acre established in 2001. All hay yield, at 3.25, was 0.6 tons above the 2.66 tons per acre in 2002. Average yield for popcorn was 3,300 pounds per acre, 300 pounds per acre more than the 2002 average.

PRODUCTION: Corn produced during 2003 was 786.9 million bushels, 25 percent above the 2002 level of 631.6 million bushels. Soybean production was 203.3 million bushels, 15 percent below the 239.5 million bushels produced a year earlier. Winter wheat production, at 29.7 million bushels, was 81 percent more than the 16.4 million bushels harvested in 2002. Tobacco production increased 5 percent, to 8.2 million pounds. Popcorn production totaled 267.3 million pounds, 19 percent above the 2002 level. Oat production of 1.1 million bushels was 21 percent above the 868 thousand bushels produced in 2002. All hay production, at 2.1 million tons, rose 30 percent while potato production also increased 27 percent. Peppermint production increased 20 percent, while spearmint production fell 10 percent. Apple production increased 27 percent to 51.0 million pounds. Peach production, at 3.4 million pounds, was 10 percent more than the 3.1 million pounds harvested during 2002. Blueberry production totaled 2.6 million pounds, a 16 percent decrease from the previous year.

^{2/} The spring season includes January 1 through June 30 and the fall season includes July 1 through December 31.				

CHEMICAL USAGE

INDIANA PESTICIDE USAGE

Herbicides were used on 93 percent of Indiana's 5.6 million **CORN** acres during 2003 while insecticides were applied to 52 percent of the acreage. Atrazine was the herbicide of choice for 83 percent of the acreage while Tefluthrin was the most often used insecticide being applied to 15 percent of the state's acreage.

LIVESTOCK HIGHLIGHTS

The total value of the four major species of livestock and poultry on Indiana farms January 1, 2004 (December 1, 2003 for swine and chickens) amounted to \$950.9 million, up 6 percent from a year earlier.

CATTLE inventory numbers, at 830,000, dropped 3 percent from January 1, 2003 and value per head, at \$830 was \$110 above the previous year. Total cattle inventory value, at \$688.9 million, increased 11 percent from the \$619.2 million last year. Cows and heifers that have calved totaled 370,000 head, down 1 percent from a year earlier. Of this total, 227,000 were beef cows, and 143,000 were milk cows, both were down 1 percent from the previous year.

HOG AND PIG numbers (December 1, 2003), at 3.10 million, were down 5 percent from a year earlier. The average value per head decreased from \$74.00 in 2002 to \$69.00 in 2003. This lowered the total inventory value to \$213.9 million, 11 percent below a

year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2003

Indiana **SHEEP** producers had 10 percent fewer sheep and lambs on hand January 1, 2004 than a year earlier. Breeding sheep totaled 40,000 head. Average value per head at \$171.00, was up \$5.00 from 2003. Total inventory value at \$7.7 million was 7 percent below the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2003, at 28.9 million birds, was down 1 percent from last year. With this inventory, Indiana ranked fifth in the nation for total chickens, excluding broilers, and moved up to third position for hens and pullets of laying age (23.6 million). The total value of the chicken inventory was \$40.4 million, up 26 percent from 2002. The value per bird increased \$0.30 from the previous year to \$1.40.

HOGS AND PIGS

The total pig crop in 2003 was 1 percent below the pig crop in 2002. Sows farrowed during the year decreased 2 percent from the previous year, while litter rates remained unchanged at 8.85. A \$4.60 increase in average price per hundredweight brought a 24 percent increase in cash receipts for 2003. Gross income of \$620 million (cash receipts plus value of home consumption) increased 24 percent from a year earlier.

SHEEP AND LAMBS

The number of sheep and lambs marketed during 2003 decreased 32 percent to 33,500 head. The total pounds of sheep and lambs marketed was 26 percent below the 2002 level. Cash receipts totaled \$2.1 million, down 14 percent from \$2.4 million in 2002. Gross income (cash receipts plus value of home consumption) totaled \$2.4 million in 2003 compared with \$2.7 million a year earlier. Sheep averaged \$35.60 per cwt. and lambs averaged \$92.90 per cwt. during 2003.

Lambs saved in 2003, at 40,000 head, was down 15 percent from the previous year. The number of ewes one year old and older on hand January 1, 2004 was down 12 percent from 2003. Lamb crop per 100 ewes one year old and older was 118 during 2003, down 2 percent from a year earlier.

Wool production decreased 4 percent during 2003 to 270,000 pounds. Sheep and lambs shorn totaled 40,000 head with an average fleece weight of 6.8 pounds. Total value of shorn wool was \$51,000, up 13 percent from a year earlier and averaging 19 cents per pound.

COUNTY HIGHLIGHTS

COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 11,000 farm operators following the 2003 harvest season. In addition to these data are selected items of interest from the 2000 U.S. Population Census, 2002 Census of Agriculture, and 2002 Cash Receipts information from the Bureau of Economics Analysis. The County Highlights' section summarizes the importance of agriculture to each and every Indiana county while comparing the magnitude of importance across counties.

Planted acreage for hay and tobacco are represented by three dashes because these categories are not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2002 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

STATE DATA

2000 Census Population	6,080,485
2002 Total Land Area (acres)	22,945,817
2002 Number of Farms	60,296
2002 Land in Farms (acres)	15,058,670
2002 Average Size of Farm (acres)	250

Electronic Information and Data from NASS/IAS

National & State Reports are available in several different medias.

The National Agricultural Statistics Service, NASS, provides meaningful, accurate, and objective statistical information and services for the United States, its agriculture, and its rural communities. NASS provides its services through a main Headquarters unit located in Washington, DC and in 45 State Statistical Offices (SSO's) serving all 50 states. The SSO's are operated under cooperative funding agreements with State Departments of Agriculture and/or land-grant universities.

Nationwide: About 400 National reports are issued by NASS every year with estimates covering about 120 crops and 45 livestock items. Each report is released on a fixed schedule according to an annual calendar of release dates. Strict security measures are maintained to ensure that no one gains premature access to the information.

Indiana: The Indiana field office (IAS) issues about 60 reports annually. The semimonthly Indiana Ag Report is a consolidated report providing basic up-to-date State & National estimates. A weekly crop and weather report (issued each Monday, April through November) reports on crop progress and conditions. An annual County Estimates report, available in the spring, details county breakdowns on crops and livestock. The Annual Summary, published in the fall, is a summary of all information issued during the year with historical comparisons.

NATIONAL REPORTS

Via E-mail.

To subscribe to one or more reports, send an e-mail message (with no subject) to:

**usda-reports@usda.
manlib.cornell.edu**

In the message, put the following:

subscribe<report code>

INDIANA REPORTS available by E-mail

AUTO FAX

Selected NASS reports and information items are available from a free fax service called NASS-Fax. To receive the items, use a touch tone telephone connected to your FAX machine to call (202) 720-2000. Voice prompts will guide you to select items of interest. The first time you access the system, request Document number 0411 which will provide a listing of the different information that is available.

HARD COPIES

If you desire, Indiana releases can also be received in "hard copy" form through the mail. Please fill out the subscription form on the next page and return it to our office.

Mail

- Indiana Ag Report-
24 issues/year
- Indiana Crop & Weather Report-
32-36 issues /year
- Indiana County Estimates
